### COURSE DESCRIPTION

The internship course provides experiential learning experience through placement in team projects. This hands-on experience allows students to gain practical skills and insights into the field of computing. By working on a collaborative project with external stakeholders, they will contribute to the development of real-world information technology products, processes, or services, and understand the challenges involved in implementing technology solutions in a professional setting.

# STUDENT LEARNING OUTCOME

- Analyze complex computing problems and identify solutions by applying principles of computing.
- Design, implement, and evaluate computing solutions that meet IT computing requirements.
- Communicate effectively in a variety of professional contexts.
- Function effectively as a member or leader of a team engaged in IT activities.
- Identify and analyze user needs in the process of developing and operating computing systems.

# **GRADING**

The internship project will follow the general structure of <u>Scrum framework</u>, which includes specific roles, events, artifacts, and rules. The product owner, project manager, and development team will be established, and project events such as Sprint Planning, Daily Scrum meeting, Sprint Release, and will be conducted. Your final grade consists of the following three components.

**10% Class Attendance** of All Required Meetings.

# 60% Sprint Grade is calculated as: Teamwork Grade \* Sprint Grade

- Teamwork Grade is based on peer evaluation for each sprint. Detailed rubrics TBA.
- Sprint Grades: You will receive a team grade for each of the three sprints, based on the technical aspect of the product and team project management. Detailed rubrics TBA.

15% Homework: additional homework in teamwork, project management and development tools.

**15% Final Project Report:** You need to earn minimal 75% in your final report grade to pass the course.

Credit hour workload estimate: a minimum of 45 hours of student academic work per credit per term.

### COURSE POLICIES REGARDING STUDENT BEHAVIOR

### Attendance

Students are responsible for attending scheduled meetings and expected to abide by the University Policy on Attendance (as stated in the *UNH Student Rights, Rules, and Responsibilities*).

Students who cannot attend a scheduled meeting have the responsibility to email the instructor about the circumstances BEFORE the class meeting and request an excused absence. You may be granted an excused absence for unexpected emergencies such as significant illness or injury, or a death in the student's extended family. Vacations, late arrivals, or early departures before summer, winter, or other breaks do not constitute excused absences.

### **Late Submissions**

Policy for late submissions is very strict and applies only in exceptional cases of student illness, accident, or emergencies that are properly documented. A late submission may be granted only if the student:

- Emails prior to the deadline and
- Explains and provides evidence for the circumstances that have prevented the student from meeting class requirement.

Failing to comply with these rules may result in no credit for the assignment.
